The clear favorite for food packaging

General purpose and specialty films that keep retail food products fresh and appealing during display

LINPAC

Founded in 1959, today the LINPAC Group is a 2.2 billion dollar, privately owned, global business providing innovative packaging solutions across a wide range of markets including: food producers, packers, retailers, caterers, fast food chains, automotive parts, environmental products, RFID identification and materials handling.

LINPAC is the largest manufacturer of PVC food-grade stretch film in the world. Our global aim is to achieve the highest standards in performance:

- ensuring total customer satisfaction
- promoting product quality excellence
- anticipating future needs

Protecting your future for our future

We lead the market in plastic and film technology innovations

focused on source reduction and reuse while enhancing film performance, improving product machinability and delivering more attractive packaging for our customers and their markets.

All our operating sites are committed to conserving resources, reducing energy consumption, minimizing emissions to air, water and soil while complying with all relevant environmental legislation, exceeding those standards where possible.

Versatile Multi-Purpose Films

Filmco has created a versatile array of general purpose and specialty films for virtually every in-store food wrapping situation. Stretch and shrink films offered for multi-purpose use as well as for specific applications such as bakery products, cheese/deli items, fish and prepared foods.

These easy-to-handle material provide excellent optics and have superb cling characteristics. The end result is a snug, wrinkle-free package with tremendous merchandising appeal.

Easy-to-use Cheese-Wrap

Don't lose cheese sales by using ineffective packaging materials designed for meat or produce use. Filmco Cheese-Wrap™ is designed specifically for retail cheese packaging. Cheese-Wrap extends cheese freshness and flavor by reducing moisture-loss shrinkage and by inhibiting the growth of mold.

Cheese-Wrap is the ultimate packaging for cheese. Films for meat just can't protect cheese from mold causing oxygen and weight loss the way Cheese-Wrap can. Cheese-Wrap inhibits oxygen transmission into the package and provides the optimal shelf life for cheese. Customers are assured of the same flavor and freshness weeks after they take it home. And Cheese-Wrap saves you money because there is less trimming of dried out corners and less product shrinkage.

Easy-to-use Cheese-Wrap stretches and clings to conform to cheese shape, creating a saleable, attractive package. Cheese-Wrap - ideal for wrapping all varieties of cheese.

- provides optimal shelf life for cheese
- more cost effective than other cheese packaging materials
- maintains cheese flavor and freshness
- low moisture transmission reduces shrinkage and weight loss
- low oxygen transmission inhibits mold growth
- stretches and clings to conform to cheese shape
