The Clear Advantage

www.linpacpackaging-filmco.com

Preserve fresh foods in a bright and appealing package

In-store stretch film packaging is an attractive, economical and flexible solution to protect and preserve your local customers' meat and produce needs

LINPAC

Founded in 1959, today the LINPAC Group is a 2.2 billion dollar, privately owned, global business providing innovative packaging solutions across a wide range of markets including: food producers, packers, retailers, caterers, fast food chains, automotive parts, environmental products, RFID identification and materials handling.

LINPAC is the largest manufacturer of PVC food-grade stretch film in the world. Our global aim is to achieve the highest standards in performance:

- ensuring total customer satisfaction
- promoting product quality excellence
- anticipating future needs

We lead the market in plastic and film technology innovations

focused on source reduction and reuse while enhancing film performance, improving product machinability and delivering more attractive packaging for our customers and their markets.

All our operating sites are committed to conserving resources, reducing energy consumption, minimizing emissions to air, water and soil while complying with all relevant environmental legislation, exceeding those standards where possible.

Cost-Effective and Profitable Stretch Film Wrapped Trays

Consumers still prefer to purchase vegetables and meats from supermarkets. In-store manual or machine wrapping offers a flexible system to package individual, medium and value-sized trays. PVC food film is the most economical solution to preserve fresh foods in a bright and appealing package which keeps prices lower for consumers. Provide your local customers a unique product assortment based on their buying habits - not a one size fits all approach of other packaging methods.

Advanced Performance Films

We innovate and manufacture the highest standards in film performance, so meat cutters and produce packers can benefit from:

- greater yields
- increased productivity
- lower food waste
- consistent packaging
- high-quality consumer reception
- packaging performance matched with your display requirements

Premium Dual-Layer and Precision Single-Layer Stretch Films

Filmco has engineered a versatile range of fresh food and specialty films for in-store manual and machine packaging applications. Filmco

Premium Dual-Layer Films are engineered to be a thinner, lighter, higher performance package that utilize two layers of film to maintain

freshness and improve product integrity. Precision Single-Layer Films are standard high-yield stretch films designed for packaging fresh meats and produce in the supermarket, either by hand or automatic stretch-wrapping machines. We'll select the right film for your application and equipment, while providing:

- greater strength, stretch, tear and puncture resistance
- tamper proof packages (premium film)
- higher yield per roll
- reduced changeovers (premium film)
- improved semi-automatic and automatic wrapping machinability
- lower material costs (premium film)

Premium Dual-Layer and Precision Single-Layer films are available for hand wrap and automatic, packaging of all products and tray sizes including:

- Ground Beef
- Meats
- Produce
- Mushrooms
- Bone-in cuts
- Sausage
- Marinated and seasoned foods
- Kabobs
- Freezer
- Cheese
- Deli
- Bakery
